Comfy and modern hotel room If you're taking a well-needed vacation or going on a business trip, you don't want to blow most of your budget on a hotel. In fact, the cost of staying in a hotel may even discourage some people from taking their dream getaway trip. Want to learn how to find the best hotel booking deals online? Whether you need a hotel in Yellowstone or a hotel in Singapore, it's possible to find great rates with a few simple tips. Bundle Flight and Hotel You can save a lot of money by bundling items in travel packages. If you're planning on flying to your destination, try to book your hotel and flight together, but be sure to pay attention to the distance between your destination airport and your hotel in bundles. Unless you're a business traveler, you will have to pay for your own rental car, if necessary, which adds to the cost. If you are traveling for business, you don't want to be so far away that you have to worry about unexpected traffic. If your trip is a vacation getaway and you don't mind the drive, you might save money by booking further away from the airport. Just treat the distance between the two like a mini-road trip. For example, if you have to go to San Francisco, try booking a hotel in Stockton. Set Alerts for Price Drops Don't have time to search for the best hotel deals every day? You can set alerts for price drops. Some major travel websites let you set an alert for a hotel or a particular date. When the price changes, you're notified by email. Certain apps track hotel prices and notify you via text. This is useful when you're considering several different hotels. It's also great when you're interested in a hotel that is normally out of your budget range. Join a Loyalty Program Another way to get discounts is by joining a loyalty program. Many hotels offer their own programs where you earn points with every stay. You can search these sites by name, keywords or location and, sometimes, you can enter a phone number to do a reverse search.Telkom Cell Phone ContractsAs Africa's biggest integrated telecommunications company, Telkom mobile contracts are also part of the company's offerings. One way to access an online phone book is through the browser of your mobile device. To do this, open your device and run a search for either a specific online directory, such as Telkom or WhitePages. Then, find the search box and enter the name of the person or business you want to call.Results to Expect If you're searching in the Telkom directory, expect to find the name, address and phone number of the party you want to call, if they have a listed number. Other information that may be included if you're looking up a business is the company profile and a link to the company website. If you're looking on a site with a map function, you may also see a map with the location pinned and an option to get turn-by-turn directions to the place you're calling.Reverse Phone Number LookupA reverse phone number lookup is done when you have only a phone number and want to know who it belongs to before you call. To do a reverse number lookup, choose a site that offers the service, such as WhitePages, navigate to the phone lookup section and enter the number. Some results may be free, while others may require a fee to unlock the information.Reverse Address LookupA reverse address lookup is another type of search you can do if you only have part of the information about the number you need to find. To do it, you enter the house number and street in one search box and the city and state or zip code in the second search box before running the query. This type of search doesn't deliver consistent results, though it can be useful and delivers some in the form of a map or satellite.
